200 square feet
[18.6 square meters]

WARRANTY

Frame: 5 years
Upholstery: 90 days
Rubber & Moving Parts: 1 year

Designed to be simple, intuitive and challenging for all fitness levels, the ELEVATE Circuit features 5 painstakingly crafted pieces that offer 7 incremental resistance levels for a more challenging workout. And all in a striking new matte black finish!

Taking the proven functional training principles developed with the PowerTower and GTS, this 5-piece commercial gym equipment package applies the unique concept of incline bodyweight training as the method of resistance, rather than the traditional weighted resistance most fitness equipment is built upon.

The ELEVATE Circuit can be placed on the gym floor as a dedicated strength circuit or used within a group setting as a circuit-style class workout or boot camp stations. The ELEVATE Circuit has over 80 exercises and is one of the most versatile gym equipment packages designed to keep your members performing at their peak.
